CAREER OBJECTIVE

Motivated Software Engineer with an extensive knowledge of web development, design, and coding, as well as experience in a wide range of programming languages, frameworks, and tools. Proven success in developing and deploying applications, websites, and web services. Highly organized and detail-oriented, with a knack for finding creative solutions to challenging problems. Results-driven Web Developer develops cutting-edge websites and web applications. Expertise in HTML, CSS, JavaScript, React, Node.js, and other web technologies. Skilled at developing custom solutions to fit client needs while delivering high-quality products on time and under budget.

EXPERIENCE

January 2023 - Present

Front End Software Engineer

FetchGoat, Atlanta, Georgia

- Utilized React.js, TypeScript, C#, and .NET to create and improve software that provides a seamless user experience
- Led wire framing, prototyping, and UX development for FetchGoat's enterprise website
- Developed and implemented user-centered design principles to improve the ease of user interaction and overall user experience
- Improved front-end stability and reliability by conducting rigorous testing and code issue resolution

March 2022 - December 2022

Junior Software Developer

Independent, Atlanta, Georgia

Developed and tested the following applications:

- HandyCart - a retail purchasing application leveraging contact list technology and financial budget parameters, utilizing JavaScript, Apollo-Server-Express, GraphQL.js, Mongoose, Tailwind CSS, and GitHub
- Pet Telehealth - a web-based application allowing pet parents to make telehealth consultation appointments with Veterinarians, built using JavaScript, Handlebars and Node.js
- CharityLocator - a mobile application that allows underprivileged people to find their next meal, leveraging JavaScript, Google Maps, Google Geo-coding API, and Materialize
